

PROJECT STATUS REPORT	
<b>Project Name</b>	Learn to invest app
<b>Scrum Date</b>	Oct 11 2022
<b>Project Status</b>	Green 
<b>Status Description</b>	Status is green: <ul style="list-style-type: none"> <li>- user auth almost done (ahead of schedule) - AWS Amplify</li> <li>- all initialization documentation complete</li> <li>- high-fi/low-fi done</li> <li>- database design done</li> <li>- front-end setup</li> <li>- database setup and live (AWS RDS)</li> <li>- back-end server deployed (AWS lambda) and working locally</li> </ul>
Activities—During the Past 2 Weeks	
Erika - back-end setup, database design	
Hayden - Setup User Auth on AWS, Started on front end setup, setup development emulators	
Erika & Hayden - low-fi prototypes, initialization docs, high-fi prototypes	
Activities—Planned for Next 2 Weeks	
Hayden - Finish setting up user auth pages/redirect to home (blank), continue creating courses (if there is extra time)	
Erika - <ul style="list-style-type: none"> <li>- Figure out permissions to invoke lambda functions/access db from front-end, write lambda functions for user initialization (once login/sign up)</li> <li>- CI/CD to deploy</li> </ul>	
Project Issues	
<ul style="list-style-type: none"> <li>- Financial data for APIs are very expensive (free versions are very limited)</li> </ul>	
Project Changes	
N/A
